EDUCATION

Ph.D. in Physics *Feb 2022 – Present*

School of Physical Sciences, Indian Institute of Technology Mandi CGPA: **8.25/10**

Thesis Title: Effects of Substitutional Doping on Ultrafast Many-Body Interactions and Valley Dynamics in Two-Dimensional Transition Metal Dichalcogenides

Thesis Advisor: Prof. Suman Kalyan Pal

M.Sc. in Physics *Aug 2018 – Oct 2020*

Department of Studies in Physics, University of Mysore CGPA: **8.38/10**

B.Sc. in Physics, Chemistry and Mathematics *Aug 2015 – Jun 2018*

Yuvaraja's College, University of Mysore Percentage: **82.08%**

PROFESSIONAL EXPERIENCE

Project Associate - I *Apr 2021 - Feb 2022*

Indian Institute of Technology Mandi, Himachal Pradesh

- **Project Title**: Study the dynamical evolution of spin and valley related many particle electronic states in two dimensional transition metal dichalcogenides using ultrafast time-resolved spectroscopy.

RESEARCH SUMMARY

Ph.D. Scholar, Indian Institute of Technology Mandi *Feb 2022 – Present*

- Developed microscopic TA spectroscopy capabilities for site-selective ultrafast optical measurements in 2D materials.
- Developed a polarization-resolved micro-photoluminescence (micro-PL) setup for investigating valley polarization in 2D materials.
- Helped establish a low-temperature TA, helicity-resolved TA (HRTA) measurement capabilities for investigating temperature-dependent carrier dynamics and polarization-dependent measurements.
- Contributed to the development of the laboratory's terahertz (THz) spectroscopy system from the gound up.
- Selected under the NFFA-Europe programme to conduct helicity-resolved photoluminescence (HRPL) measurements at IESL-FORTH, Greece, to investigate valley polarization in 2D materials.

Project Associate - I, Indian Institute of Technology Mandi *Apr 2021 - Feb 2022*

- Optimized mechanical exfoliation protocols for monolayer 2D TMD samples.

M.Sc. Student, University of Mysore *Aug 2018 - Oct 2020*

- Contributed to two studies on structure–property correlations in millets and areca nuts using XRD, Raman, SEM, FTIR and AC susceptibility techniques.

CONFERENCES AND SEMINARS

- Poster Presentation - Graphene India 2026 - Kochi - March 09-12, 2026. **(Best Poster Award)**
- Poster Presentation - 12th Theme meeting on Ultrafast Sciences (UFS) 2025 - IIT Hyderabad - November 13-15, 2025.
- Poster Presentation - International conference - 2D Transition Metal Dichalcogenides 2025 at Churchill College, University of Cambridge, July 20-24, 2025.
- Poster Presentation - International conference on Ultrafast Nonlinear Optics and Optical Spectroscopy (UNOOS) - IISER Mohali - 10-12 Dec 2024. **(Best Poster Award)**
- Poster Presentation - One Day Workshop - Electronic Materials: Preparation, Characterization and Application - IIT Mandi - 20 Apr 2024.
- Poster Presentation - One Day Workshop: Celebrating National Science Day, School of Physical Sciences, Indian Institute of Technology Mandi, 28 Feb 2024.
- Poster Presentation - 10th Theme meeting on Ultrafast Sciences (UFS) 2023 - NPL Delhi - 25-27 Nov 2023.

- Attended Virtual Online Workshop - Light-Matter Interactions in Low Dimensional and Topological Photonic Materials - IISc Bangalore - 27 Jan - 1 Feb 2022.

HONORS AND AWARDS

ANRF International Travel Support (ITS) Grant *July 2025*

- Awarded by the Anusandhan National Research Foundation (ANRF), Government of India, to support international travel for presenting research work at a scientific conference.

INSPIRE Fellowship *2022 - 2027*

- Awarded by the Department of Science and Technology, Govt. of India, recognizing the academic excellence and research potential in the field of Physics.

KSTA Merit Cash Award *2015*

- Awarded by the Karnataka Science and Technology Academy for academic excellence.

INSPIRE-SHE Scholarship *2015 - 2020*

- Awarded by the Department of Science and Technology, Govt. of India, for ranking among the top 1% in class XII.

Best Outgoing Student of the Year *2013*

- Awarded by Janata Vidyalaya Dandeli in recognition of outstanding academic performance and overall excellence.

RESEARCH SKILLS

- **Ultrafast Spectroscopy:** Extensive experience in transient absorption (TA) spectroscopy, including microscopic TA, low-temperature TA, and helicity-resolved TA (HRTA); experience in ultrafast laser operation, maintenance and upkeep.
- **Photoluminescence Spectroscopy:** Temperature-dependent and polarization-resolved photoluminescence (PL) spectroscopy; routine calibration and maintenance of PL instrumentation.
- **Raman Spectroscopy:** Operation of the Horiba LabRAM HR Evolution Raman spectrometer; experience as a Teaching Assistant for the instrument at the Advanced Materials Research Centre, IIT Mandi.
- **Material Preparation:** Mechanical exfoliation of layered two-dimensional materials and preparation of monolayer TMD samples.
- **Additional Instrumentation:** Instrumentation-level setup and operation of Z-scan and terahertz (THz) spectroscopy systems.

ADDITIONAL SKILLS AND INTERESTS

Technical Skills C | Python | Matlab | GNU Octave | LaTeX

Languages ***Fluent:*** Kannada English Hindi Konkani ***Beginner:*** Japanese French

Hobbies Deltiology | Chess | Trivia
